

10/528986

What is claimed is:

JC17 Rec'd PCT/PTO 24 MAR 2005

1. (original) A suction device for a power tool (10a, 10b), in particular for a drilling and/or chipping tool, with at least one dust container (12a – 12c) and at least one suction head (14a – 14c) to be placed on a work piece (16a, 16b), wherein the dust container (12a – 12c) is integrated in the suction head (14a – 14c).
2. (original) The suction device as recited in Claim 1, characterized by a suction unit (18a, 18b) integrated in the power tool (10a, 10b) for producing a vacuum in the suction head (14a – 14c).
3. (original) The suction device as recited in Claim 2, wherein the suction device (18a, 18b) includes a cooling fan (20a, 20b) of the power tool (10a, 10b).
4. (currently amended) The suction device as recited in ~~one of the preceding Claims~~ Claim 1, characterized by a unit (22a – 22c) that includes at least the suction head (14a – 14c) and is capable of being detachably retained on the power tool (10a, 10b).
5. (currently amended) The suction device as recited in ~~one of the preceding Claims~~ Claim 1, characterized by a unit (22a – 22c) that includes at least the dust container (12a – 12c) and is capable of being detachably retained on the power tool (10a, 10b).
6. (currently amended) The suction device as recited in Claim 4 ~~or 5~~, wherein the unit (22a – 22c, 72a) is retainable on the power tool (10a, 10b) using a snap-in connection.

7. (currently amended) The suction device as recited in ~~one of the preceding Claims~~ Claim 1,

wherein the suction head (14a – 14c) is supported on a housing (26a, 26b) of the power tool (10a, 10b) by a bearing unit such that it is displaceable along a working direction (24a – 24c).

8. (original) The suction device as recited in Claim 7,
wherein the bearing unit (46a – 46c, 48a) includes a depth stop.

9. (currently amended) The suction device as recited in ~~one of the preceding Claims~~ Claim 1,

wherein the suction head (14a – 14c) includes at least one opening (30a – 30c) through which a tool (32a, 32b) is capable of being guided in at least one operating state.

10. (original) The suction device as recited in Claim 9,
wherein various dimensions can be selected for the opening (30a' – 30c').

11. (currently amended) The suction device as recited in Claim 9 ~~or 10~~,
wherein the opening (30a – 30c) forms one end of a funnel-shaped receiving area that tapers in the working direction (24a – 24c).

12. (currently amended) The suction device as recited in ~~one of the preceding Claims~~ Claim 1,

wherein an air stream is capable of being introduced into the dust container (12a) through a duct section (82a) of the suction head (14a) in a circumferential direction of the dust container (12a).

13. (original) Drilling and/or chipping tool with a suction unit (18a, 18b) for producing a vacuum in a suction head (14a – 14c) of a suction device at least as recited in Claim 3.
